What is Agile?

- Agile is a way of doing work.
- Agile is how software products are delivered today.

But first, what was happening before the Agile way of work.

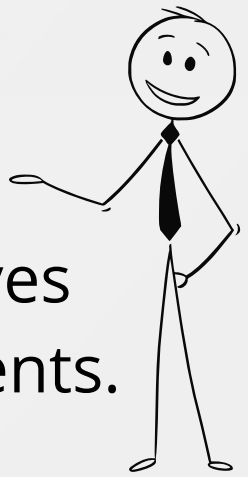
Waterfall Approach

Imagine you are building a product for your client.

The client gives you requirements.



You look at the requirements and analyze them.

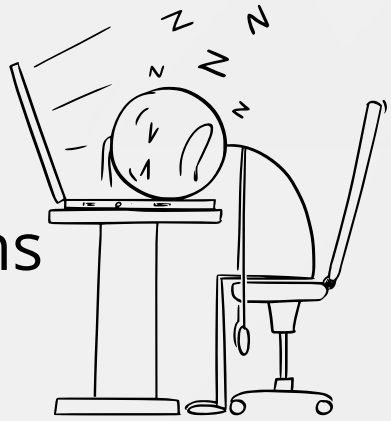
Now no need for any further discussion.

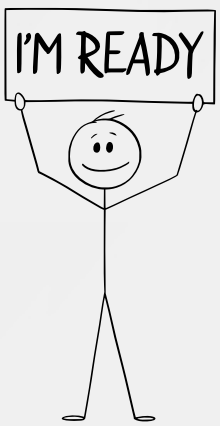
Oraask

in/hassanabdo

Yes, I will start working on the product.

The days .. months count.





HOLA!! finished let's deliver the product to customer.

Customer is waiting.

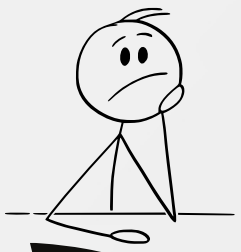
ORAASK

in/hassanabdo

I don't want it like this.

Days and months of effort are gone.

WAIT...



I will start again..
No, lets edit that part
No .. Yes .. No ....

Agile Approach

Agile methodology is your savior in such scenarios

It works by breaking projects down into little bits of user functionality called **user stories**

Prioritizing them

Continuously delivering them in short two-week cycles called **iterations**

12 Principles of Agile

1. Customer Satisfaction.
2. Welcome Change.
3. Deliver Frequently.
4. Daily Collaboration.
5. Motivated Team.
6. Face-to-Face.
7. Working Software.
8. Sustainable Work Pace.
9. Good Design.
10. Simplicity.
11. Self Organised teams.
12. Continuous Improvement

Agile's four main values are:

- Individuals and interactions over processes and tools.
- Working software over comprehensive documentation.
- Customer collaboration over contract negotiation.
- Responding to change over following a plan.
