React is a **library** maintained by
facebook.

*And it **not overhyped** at all. Trust me.*

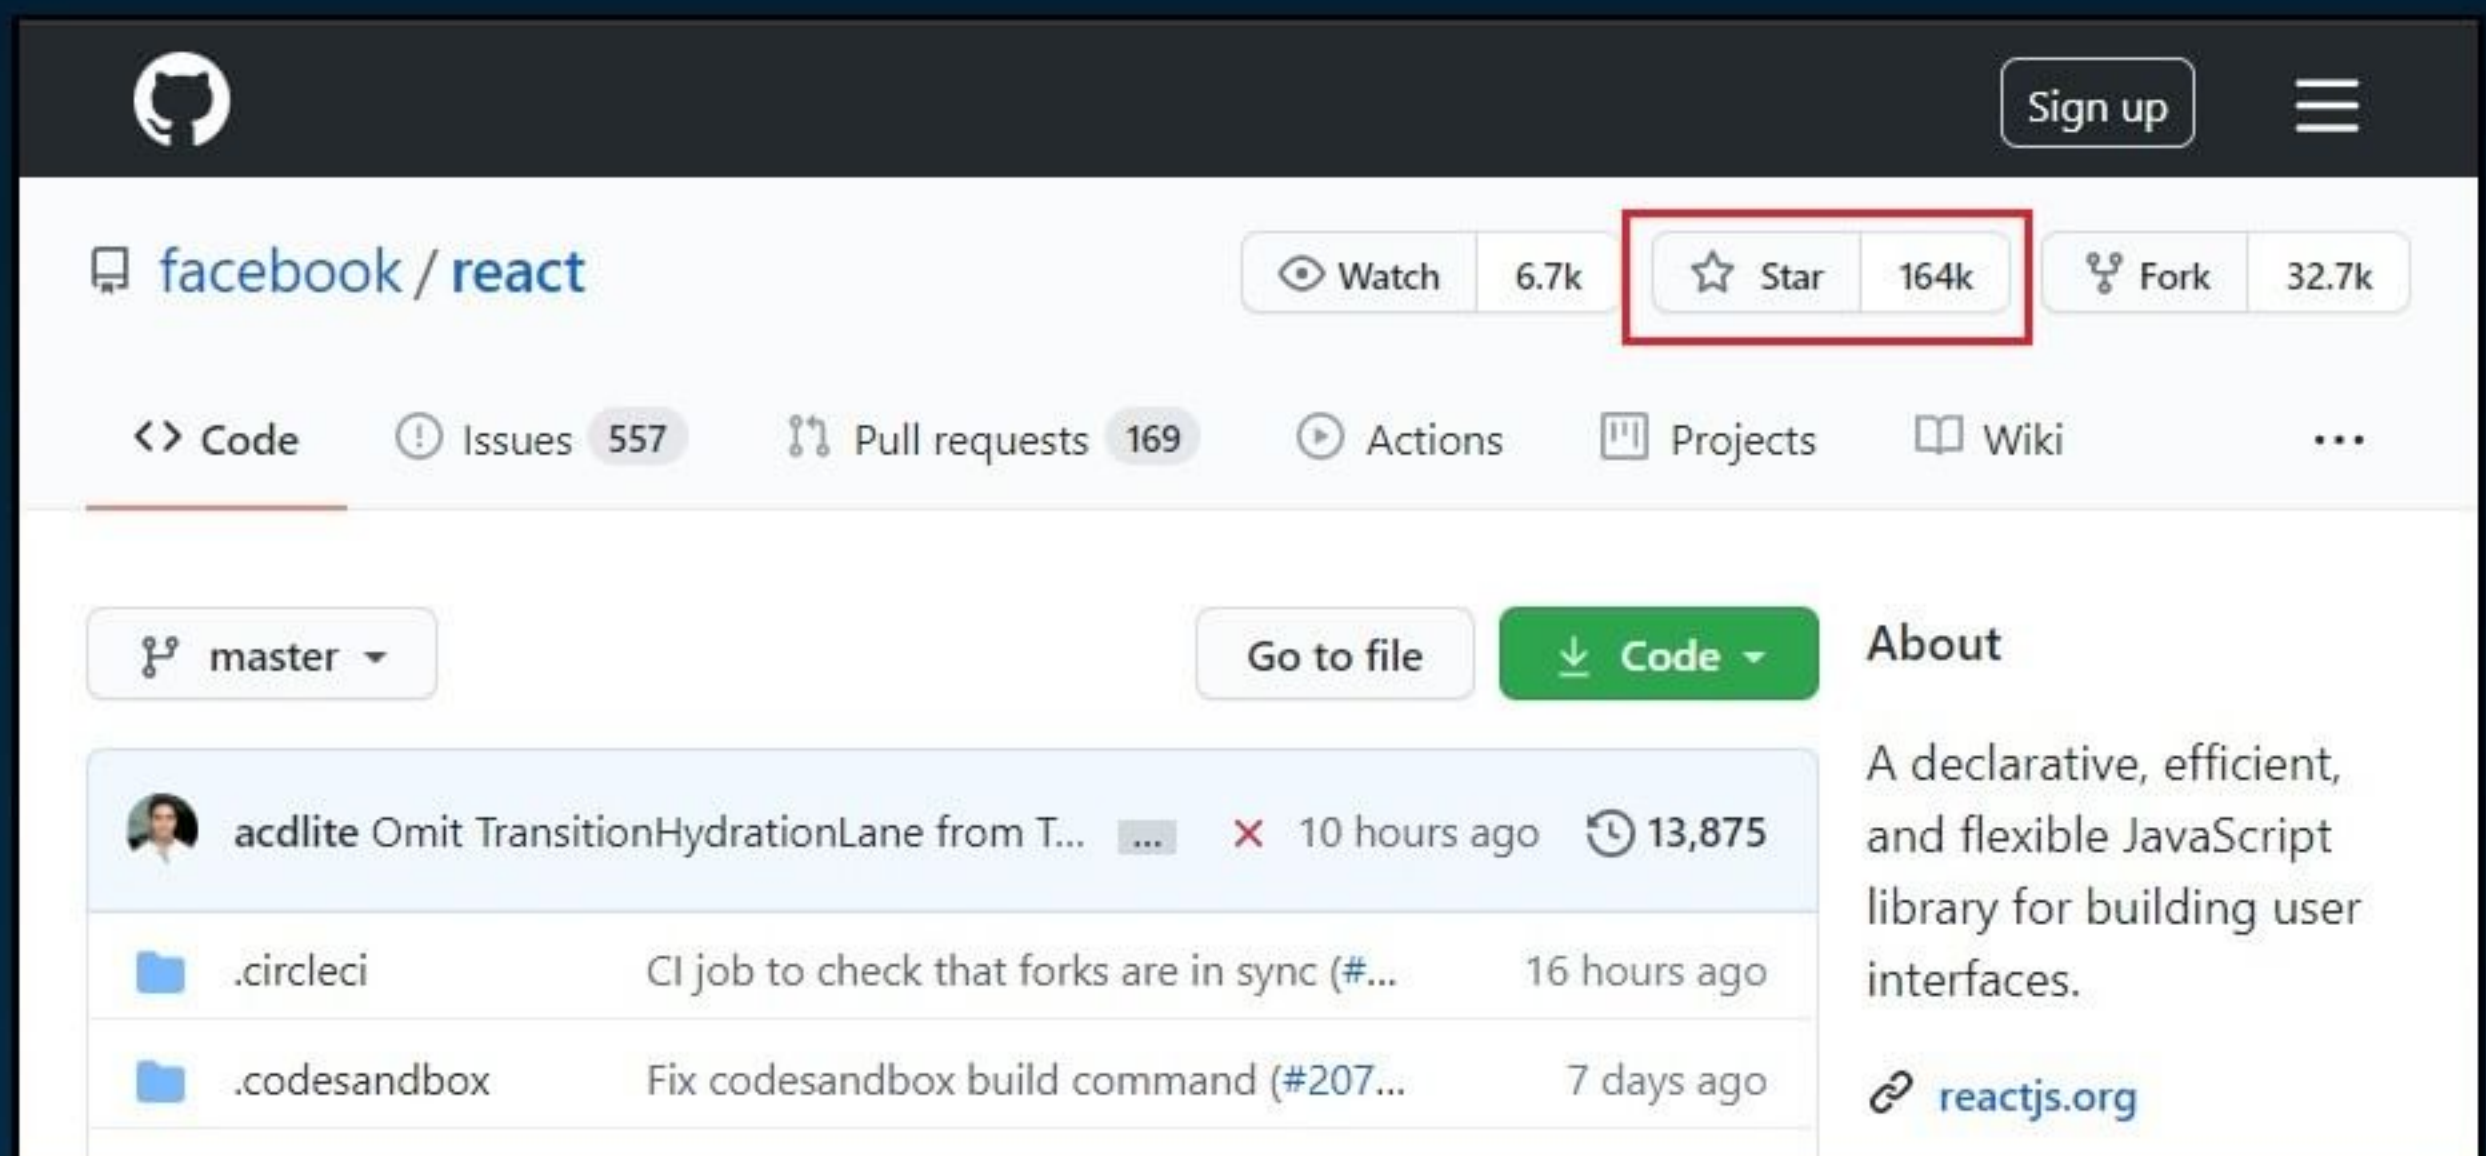

Flexibility.

Once you have learned it, you can use it on a **vast variety of platforms** to build **quality** user interfaces.

"Learn Once and Write Everywhere"

Community Support.

REACT community is **massive**. I repeat, massive. Its GitHub repository is one of the **top Repositories** on GitHub.

Virtual DOM.

When you comment on IG, only the comment section is updated instead of the whole webpage being reloaded. This is because of **Virtual DOM**.
