Explaining Programming to Normal Humans

art by
Lucas Andrade

Hi there 🖐️
Non Programmers

so programming is just like
explaining a really dumb kid
to do something

me explaining a child to
take a shower →

Program:

1. Get in the Shower
2. Turn on the water
3. Use Soap, not all the walls
4. Use Shampoo, on your hairs
5. Rinse it all off
6. Turn off the water
7. Dry off with Towel

Output:

ERROR

Child showers with clothes on

We have to be very specific
and make sure it does not do
what its not supposed to do
